

# MS Custom Application, LLC

## Offering High Clearance Side Dressing and Fungicide Applications

- **Our Sprayer**
  - 2016 Hagie STS10
  - Features All-Wheel Steering which will reduce the amount of plants knocked down on end rows
  - 100ft boom with necessary spray tips
  - "Y-Drops" for Side Dressing
- **Side Dressing**
  - Application will be done using a "Y-Drop" style system where the Nitrogen is laid on top of the ground and placed at the base of the plant
  - A morning dew running down the corn stalk is enough moisture to carry the Nitrogen down to the root zone if rain isn't imminent
  - Expanded Application Window: V6-Tassel
  - Increased Nitrogen efficiency as a corn plant needs 75% of its Nitrogen after V10
- **Fungicide**
  - We will use an application rate of 15 gal/ac which increases plant coverage compared to an airplane
  - Willing to apply Insecticides, if needed, during application
- **Customer Service**
  - You will be in direct contact with Kiley Swanson, who will be running the sprayer, which means you will get the most accurate estimated time of arrivals and field update notices
  - Application maps, of each field, in your hands within 24 hours of application
